

# HOW MUCH COMPOST DO I NEED?

## 1. USE A COMPOST CALCULATOR

Visit <https://www.greenwaste.com/products/sacramento/composts>, then scroll down to the compost calculator. Enter the length, width and depth of your project area. (For the depth, use around 1/2 an inch if applying compost to your top soil and around 6 to 8 inches when amending your soil.)

## 2. GUESSTIMATE WITH THE IMAGES BELOW

If you aren't exactly sure of the size of the project area, take a look at these piles of compost in order to get a sense of exactly how much you'll be getting.
